ABN x AISO Weekly Meeting 1

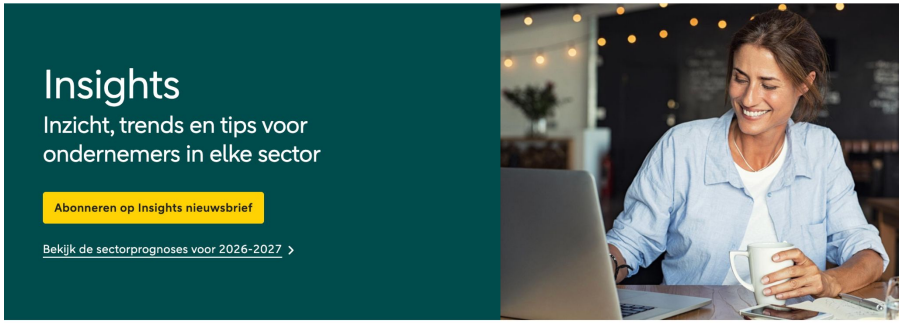
24 April

Things for today

- Update on general information
  - Channel: Insight page
  - Current Focus
  - Updates on the documents?
  - Insight article language
- Individual Progress

Confirmed General Information and Goal

- Channel: Insight page
  - lots existing articles can be seen as approved examples
  - Able to provide draft versions before final approval
  - Many simple and complex tasks can be applied to this channel
  - Problem: Language (later slides)
- User Profile:
  - Someone writing article based on domain knowledge,
  - Someone evaluate article before published
  - Someone maintain article in regular basis



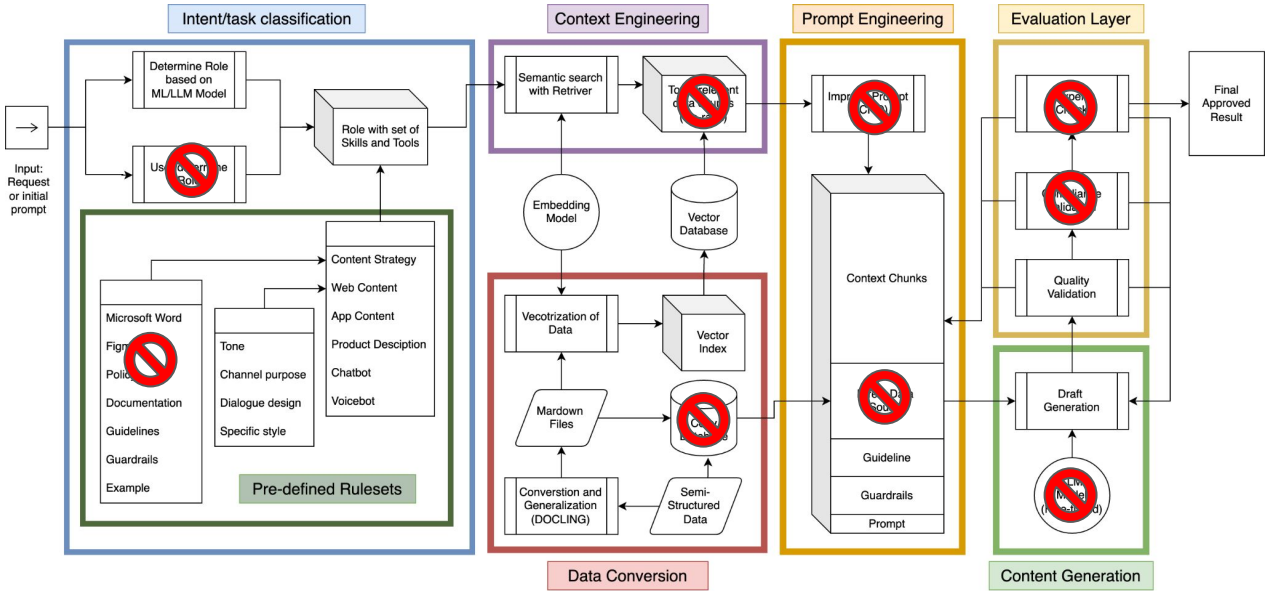
Lees de laatste ontwikkelingen en trends uit jouw sector. Volg de bevindingen van onze experts en andere ondernemers en ontdek alles over veilig zakendoen. Laat je inspireren door onze artikelen met een blik op diversiteit en inclusiviteit.

What to deliver in the end

- Proof of Concept for content generation system
- Tested on different evaluation matrics and testing prompts with sufficient statistical results
- Valuable business case report on the potential of this system and tradeoffs using different architecture

Current Focus

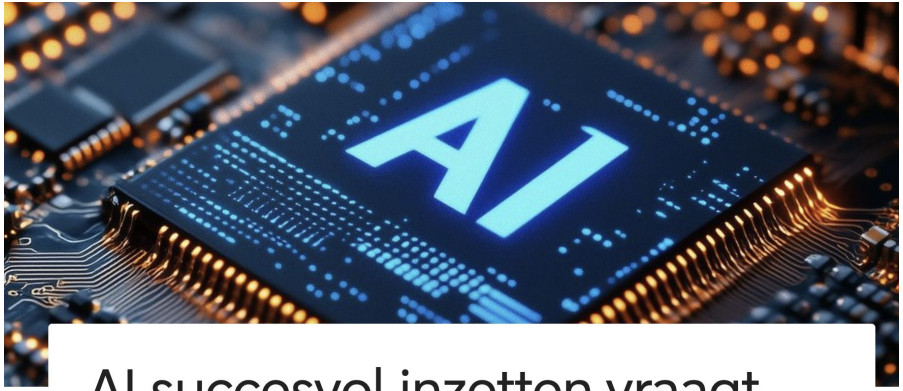
- First MVP with simple input and output
- Prepare Mid-cycle presentation 11-15 May
- Evaluate/implement different RAG/general architecture



Any updates on the documents?

- Specific documents to Insight page
- Approved examples ✅
- Rejected example, or first drafts before approved (Sven)
- Reviewer checklist/KPI list/quality rubric (Sven)

Language Issue with Articles



AI succesvol inzetten vraagt meer dan technologie

Mario Bersem

De TMT-sector groeit als vanoud. De groei zwakte in 2023 en 2024 af door oplopende rentes en de werkgelegenheid in de sector daalde zelfs. In 2025

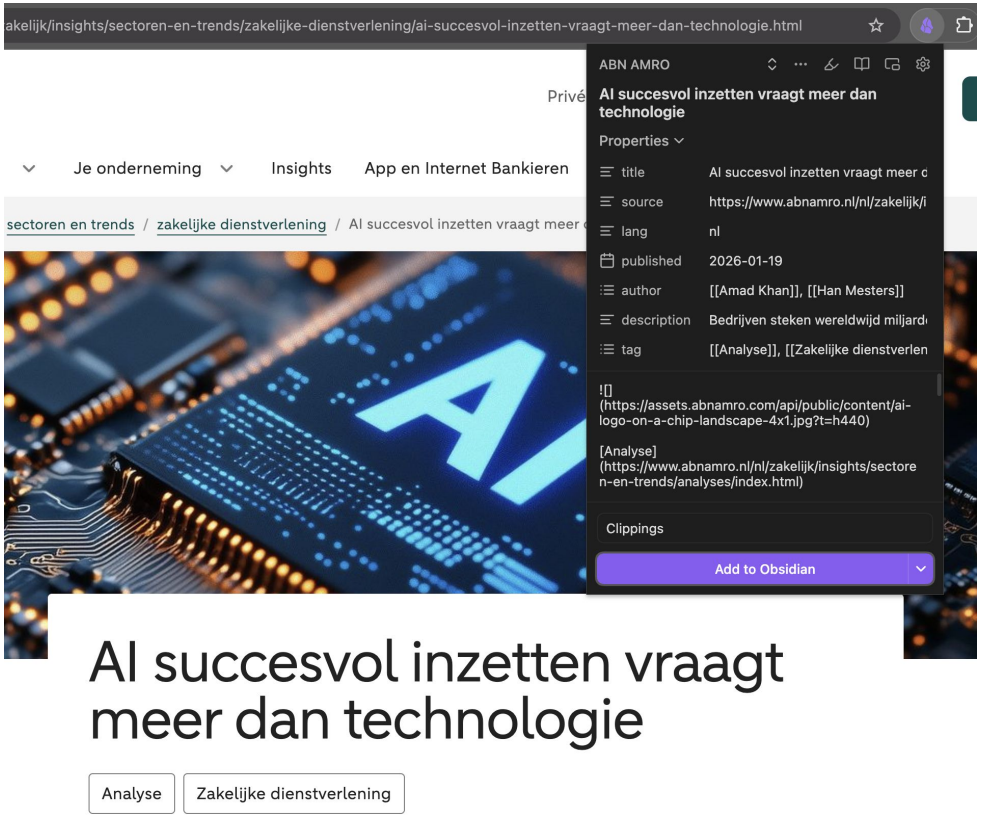
Language Issue with Articles

- All Insight articles are in Dutch
- If final result in Dutch then all system prompts and documents needs to be in dutch
- 2 Cases of result:
  - Dutch: easy to get documents and examples, but hard for team to work on since we needs to evaluate on the intermediate results
  - English: easy for us to work on, but how we translate the documents in a accurate enough way needs to be further investigated. For example using the writing reference
- My suggestion: Go first on English, since the amount of document is relatively small, translate them using writing reference in a controlled way is doable. In later stages we can add additional pipelines for Dutch if we can show English is already working. Bilingual is also a adds business value.

My Progress: Extract Articles

- Articles to markdown using Obsidian web clipper, easy and fast

title	{{title}}
source	{{url}}
lang	{{selector:html?lang}}
published	{{selector:[data-component-type="news-article-intro"]
author	{{selector:[data-component-type=news-article-intro] a
description	{{description}}
tag	{{selector:#bottomChips [data-component-type=chip]



My Progress: Extract Articles

- Save 10 articles from the sector **Technologie, Media & Telecom**, fits to AI Theme
- Translated to English
  - Currently just polished british using GPT 5.4

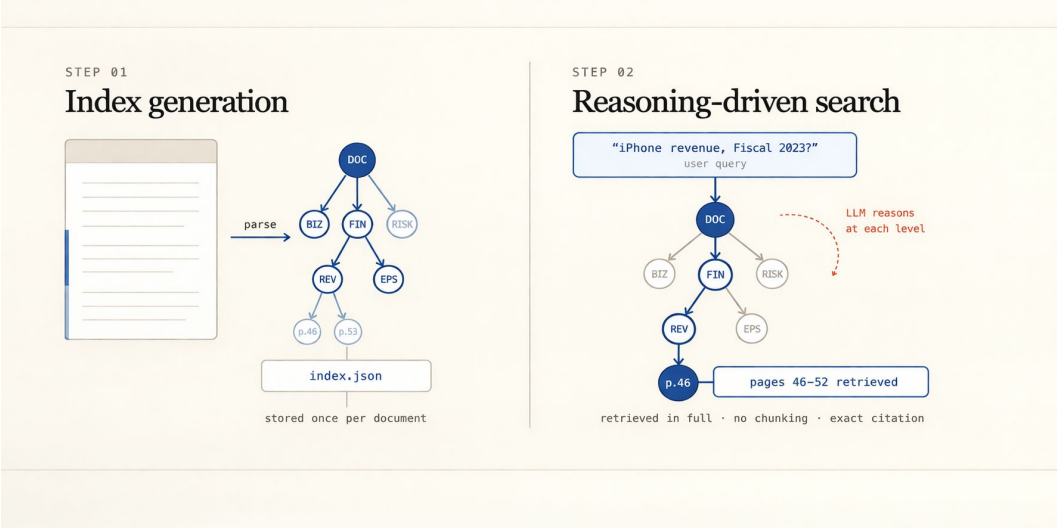
Companies worldwide are investing tens of billions in artificial
intelligence, yet only a handful are seeing demonstrable
returns. The organisations willing to redesign both their
business model and operations with the help of AI are setting
the tone for the years ahead.
```

My Progress: Vectorless RAG

- Good and rare opportunity to analysis different architecture and choice
- PageIndex
- State of the Art for vectorless RAG
- Large context window
- Worth analysis the tradeoffs
- Provide good insights for ABN



My Progress: Next

- Initial testing with PageIndex
- Define Rules Profile for User Intent
- Testing prompts for Mid-cycle
- Evaluation for Mid-cycle
